## **Manufacturer of rock drill alternative spare parts**

HİDROLİFT BVS Company was established in 2002 by Burak YETİŞ in Ankara. The aim of its establishment is to produce spare parts and hydraulic cylinders for construction machinery. Since 2005, its progress has been directed in the sector to the production of spare parts for ATLAS COPCO brand underground (JUMBO) and overground (ROC) hydraulic rock drills due to the shortage of supplying of qualified spare parts in the market. In the following years, by expanding its product range due to the supply and demand in the sector, its progress in the sector as of 2016 ATLAS COPCO, EPIROC, TAMROCK and SANDVIK; started to produce spare parts for underground (JUMBO) and overground (ROC) hydraulic rock drilling machines, underground mini loader, underground lorry (mini transporter), underground cymba (ceiling driller) machines. It has become the leading company in the sector by representing all the spare parts it has produced in terms of both size and quality at international standards and its name has been mentioned frequently. As of 2018, it has gained the trust of its customers in terms of quality and warranty by exporting 63 % of the spare parts to other countries. Today, Hidrolift BVS is an important supplier of the sector with an annual production capacity of 186.000 pieces.

## All Works We Do

- Design
- Production
- Quality Control
- Installation
- Test
- Handling
- Delivery or Stock

*Atlas Copco*

 **Epiroc**

**SANDVIK**

**TAMROCK**

Our Mission to serve with high quality, guaranteed and reliable products while using the knowledge and experience in the sector at the highest level, analyzing customer needs and expectations, offering appropriate solutions and value suggestions, offering a wide range of products and services in the fastest and most effective way

Our Vision to become a world brand that shapes the sector and determines the market conditions in ATLAS COPCO, EPIROC and SANDVIK branded construction equipment, to be the first choice of our customers with its product and service quality, as the number one spare part manufacturer and technical service provider with our guarantee policy. At the same time, to be a leading company that makes a difference by ensuring its continuity and is taken as an example by its competitors.

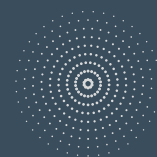

# hidrolift BVS

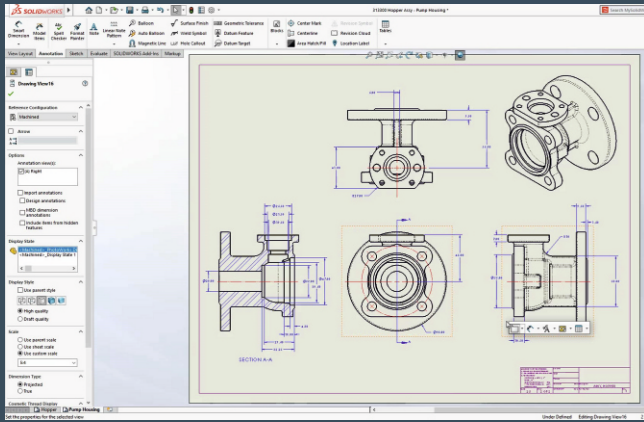

---

- PRODUCTS THAT DO NOT CONCESSION ON QUALITY
- CONFORMING TO INTERNATIONAL STANDARDS

We use the latest technology methods in manufacturing and we produce the products without compromising quality...

**Design:** All of the spare parts that we produce by designing in accordance with the measurements taken from the original and zero samples, and technical drawings suitable for manufacturing, are prepared by us.

**Production:** After the technical drawings of the spare parts, the samples are sent to analyze for detailed analysis for the desired suitable life. In accordance with the analysis results, the material to be selected for the guarantee of long life is subjected to the necessary tests with the help of the necessary analysis programs. In accordance with the analysis results, the appropriate material is supplied and operations such as heat treatment, grinding, coating, which should be appropriate in order to keep the life of the material at a high level and to keep the measurement accuracy high, are determined and sorted before starting machining. Then, the machining of the product is started and the necessary processes are performed respectively.

## SCOPE OF OUR BUSINESS

Consulting  
Project designing  
Supplying  
Spare part  
Manufacturing  
Warranty

**Quality Control:** The products are subjected to inspection and testing at the entrance, during the process, before assembly, after assembly and before shipment, and the results obtained are reported.

- Dimensional Measurements
- Surface Roughness Measurements
- Non-Destructive Testing Methods are other control methods.

**Installation:** If requested, the successfully completed parts are presented to the customer with the assembly personnel who are experienced and knowledgeable in Hidrolift BVS, as assembled.

**Test:** Every successfully assembled part is subjected to 100% pressure and sealing, impact tests.

### Applied Test Methods;

- Pressure Testing
- Internal Leakage Test
- Life Test

**Handling:** Packaging is carried out in accordance with the requirements of local and international legislation (ISPM 15) and customer specifications.

**Stock:** The breadth of the product range of Hidrolift BVS company also makes its stock management policy different compared to other companies. Hidrolift BVS offers customer-specific solutions in tailor-made logic. For these reasons, Hidrolift BVS has a fairly high stock of the world's elite brands.

Thanks to the stocks, it can offer both fast and alternative solutions to its customers.
